

Excluded outright (6 of 9). Item 4 is addressed but not fully resolved. [X] = cannot be excluded with the available public data.

1 implementation error
2 normalisation
3 platform unsuitability
4 sample size*
5 biopsy timepoint
6 treatment regimen
7 endpoint definition
population composition [X]
weakness intrinsic to the derivation cohorts [X]

* Power 0.93 at AUC 0.70 and 0.999 at AUC 0.77: excluded against the published performance, not against a weak signal (power 0.347 at AUC 0.60). Item 7 needed no data panel: the native endpoint of GSE215868 is 24-month long-term benefit (PFS-derived), not RECIST, so response was re-derived from best overall response.
